**Circle Cut #729**  
**THE Universal Cutting Oil – No Sulfur/Chlorine**

**CIRCLE CUT #729** represents an entirely new way of thinking about lubricating and cooling metalworking operations. Available in several different viscosities, **CIRCLE CUT #729** lubricates and cools dramatically better than conventional sulfur and chlorine types of oils.

**CIRCLE CUT 3729** eliminates the need for smelly sulfurized oils as well as chlorinated oils which are considered health and environmental hazards the world over. Instead, **CIRCLE CUT #729** uses natural and synthetic sources of phosphorous to achieve levels of lubricity never before seen.

**CIRCLE CUT #729** really is this good. Try it on threading, turning, broaching, drilling, tapping, perforating, milling, or gun drilling. **CIRCLE CUT #729** shows complete compatibility with steel, copper, aluminum, and titanium alloys.

The future is **CIRCLE CUT #729**. Gone are the days of needing several oils for a variety of metalworking applications. Gone are the days of going home smelling like rotten eggs.

US and International distributor inquiries are invited.
